

SPRINGFIELD REGIONAL MEDICAL CENTER

Client: Mercy Health Partners
 Location: Springfield, OH
 Size: 40 acres

A dramatic new hospital is transforming the skyline of downtown Springfield and delivering improved health care to greater Springfield. Six urban blocks have become a unique landscaped campus hosting tree allés, a garden terrace, a therapy garden and two green roofs to uplift spirits and provide a healing environment for patients, family members, staff and neighbors.

The therapy garden will provide opportunity for patients to gradually regain walking and motor skills in an outdoor environment. Sitting plazas at the entry and a garden terrace at the cafeteria will provide gathering spaces and opportunities for personal reflection and meditation. Two green roofs create healing vistas the views from public and private spaces within the hospital.
