

THE COLUMBIA TOWNSHIP COMPREHENSIVE PLAN 2005

Client: Columbia Township
Location: Hamilton County

The Columbia Township Comprehensive Plan will serve as a guide for growth and change for the next 20 years. The Plan is based on current (2004-2005) conditions, trends, economic & market data and high level of public participation. This information and analyses, along with educational materials about basic planning principles, was presented to a Vision Committee and the East and West Focus Groups. These "citizen planners" established planning goals and objectives. With the input of citizen planners, public input from public opinion surveys and comments at Township Open House meetings, a series of "Action Items" were developed to focus public and private planning, land use and development efforts. The long range plan represents a true consensus of the Vision Committee, Focus Groups, citizens and elected officials.
