

# DeSALES CORNER PHASE II

Client: Towne Properties  
Location: Cincinnati, Ohio  
Size: +/- 3 acres

DeSales Plaza Phase II is an urban development containing nearly 100 residential apartment units. The site and building have been designed sustainably and the project is registered for LEED Certification from the U.S. Green Building Council.

Meisner + Associates / Land Vision created landscape design for the development. The design incorporated drought tolerant plants that would screen site utilities, buffer neighboring properties and survive an urban environment.

The planting improvements exceed landscape requirements, provides year round interest, and softens the edges of the new housing and surrounding urban environment.
